The Restorative Dentistry Department also has significant involvement in the provision of tertiary services including the care of patients with varying and complex treatment needs, in particular those who require multi-disciplinary care. This includes the management of head and neck cancer patients; patients with other acquired defects due to surgery and orofacial trauma; and developmental and congenital abnormalities including cleft lip and palate, joint orthognathic and/or orthodontic cases, hypodontia and other disturbances in tooth development.	
10.	Suitable for Temporary Registrant?		NO
11.	Primary Care element Performer Number required?		NO

DENTAL CORE TRAINING 2026/27

NHS Scotland

Aberdeen Dental Hospital – Restorative Dentistry

12.	Pattern of working including any on-call commitment	Monday – Friday No on call commitment	
13.	Educational programme summary	There is a Scotland-wide education programme for Dental Core Trainees which is designed to match the DCT curriculum. The programme has four themes running through each year of Dental Core Training. These are: Clinical, Communication, Career Development Skills and Quality Improvement & Patient Safety. Posts begin with a local health board and NES induction, followed by face-to-face study events throughout the year, supported by Turas Learn. These events include all Dental Core Trainees in Scotland, as does the annual DCT conference. All trainees have access to study leave time (in line with terms and conditions of service) and budget. This is predominantly to fund attendance of DCTs at the compulsory NES Educational events, however funding may be available to contribute to the cost of other courses linked to an agreed PDP. DCT posts include time for self-directed learning and trainees are encouraged to use this time for personal study and to complete quality improvement projects.
