# Background and purpose of Framework

The Scottish Government has specifically highlighted the need to reduce health inequalities for people with learning disabilities as a core element of the Keys to Life strategy. It also has a focus on increasing access to psychological therapies across the whole population. Given that it is well recognised that there is greater prevalence and incidence of mental health problems in adults with learning disabilities compared to the general population, it is important that the specific needs of people with learning disabilities are considered. This has led the Psychology Directorate of NHS Education for Scotland to establish a specific project to develop a training strategy for psychological interventions for adults with learning disabilities in Scotland.

In recent years the Psychology Directorate of NHS Education for Scotland has developed a wide range of training in relation to psychological interventions across a range of populations. However, no specific training plan in relation to psychological interventions for adults with learning disabilities was

available, and there were therefore very few training events for staff working specifically with this population. The Nursing Directorate in NES has been involved in commissioning and developing some training in psychological interventions in relation to challenging behaviour “[Positive Behavioural Support: a learning resource](#)” (2012) and “[Improving Practice: supporting people with learning disabilities whose behaviour is perceived as challenging - an education resource for support workers](#)” (2014)) and in psychological care “[Thinking about me? Essential psychological care for people with disabilities](#)” (2014). Whilst there was significant input from psychologists into many of these resources, there were no specific developments for applied psychologists working with adults with learning disabilities. Staff working in learning disability services would sometimes access training for other groups but at times there was uncertainty as to the appropriateness of training and occasionally difficulty in accessing it.

The NHS Education for Scotland document, “[The Matrix - A Guide to Delivering Evidence - Based Psychological Therapies in Scotland](#)” (2014) does now include a specific section on psychological therapies and interventions with adults with learning disabilities, but acknowledges that the level of evidence required to meet the standards set in the Matrix is difficult to achieve in learning disability services (due to factors such as the wide range of abilities included within the diagnosis of learning disability, consent and ethical issues making it difficult to establish a robust evidence base). The Psychology Directorate in NHS Education for Scotland has two major areas of responsibility: training of psychologists for NHSScotland and upskilling the existing multi-professional workforce in psychological care. This Knowledge and Skills Framework has been developed as the first stage of this process, with the aim of considering both of these areas of responsibility in relation to health services for adults with learning disabilities. Although the focus to date has been on health service

provision, the Framework has also been designed so that it should also be applicable to a wide range of staff working in social care settings.

## Need for provision of psychological interventions for adults with learning disabilities

The 2016 report [Psychological therapies and people who have intellectual disabilities](#) by Commissioning Team for the Faculties for Intellectual Disabilities of the Royal College of Psychiatrists and the Division of Clinical Psychology of the British Psychological Society highlights a number of factors that need to be considered in relation to improving access to psychological interventions for this population as detailed below. Note that this document uses the term intellectual disabilities (ID) instead of learning disabilities.

### **Failure to recognise mental health needs**

Failure to recognise, diagnose and respond to the mental health needs of people with ID was the result of a number of interrelated factors:

- societal and cultural beliefs that people with ID do not experience the same range of emotions as those without these difficulties;
- institutional settings served to segregate and ‘hide’ people with ID;
- the process of diagnostic overshadowing whereby all difficulties were attributed to the primary ID;
- poor attendance at primary care services which reduced opportunities for referral for specialist assessment;
- failure to diagnose mental health difficulties;
- cognitive and communication difficulties reducing the individual’s ability to express symptoms verbally, thus masking their internal world;
- the fact that certain issues may manifest differently across the range of levels of ID, for example it is easier to identify problems in people with mild/moderate ID, as they are more likely to be clearly identifiable;
- lack of standardised assessment tools;

- 
- dependence on third parties to recognise issues and access appropriate assessments;
  - failure to discriminate between challenging behaviour and mental health needs in service systems; and
  - lack of specialised training for professionals and researchers.

## **Risk factors for the development of mental health difficulties**

People with ID can experience a range of biological, psychological and social factors which increase their vulnerability, with implications for susceptibility to the development of mental health problems.

## Need for provision of psychological interventions for adults with learning disabilities

### **Biological factors may include:**

- genetic liabilities;
- biochemical and structural abnormalities;
- abnormal thyroid functioning;
- epilepsy;
- sensory impairments; and
- medication side-effects.

### **Psychological factors may include:**

- communication deficits which lead to frustration and lack of motivation;
- specific emotional awareness deficit – difficulty understanding the emotions of others;
- limited range of coping mechanisms;
- limited outlets for expression of emotional needs;
- low self-efficacy and self-esteem;
- perceived powerlessness and external locus of control;
- difficulty forming deep friendships;
- attachment difficulties or interrupted attachments; and
- the effects of labelling and stigmatisation.

---

### **Social factors may include:**

- not being held in esteem within society;
- restricted access to valued activities such as employment, marriage and parenting;
- low income and poverty;
- increased risk of physical and sexual abuse;
- impoverished support systems;
- poor quality of life – current or historic;
- lack of meaningful leisure opportunities; and

Whilst acknowledging there are a wide range of prevalence estimates the above report notes that the study by Cooper et al (2007) in Glasgow identified results indicating that 40.9% of the adults with learning disabilities in the population studied had an identifiable mental health diagnosis, with prevalence reducing to 22.4% if challenging behaviour and ASD were excluded.

## Supporting psychological wellbeing in adults with learning disabilities

Development of the knowledge and skills Framework on psychological interventions for practitioners working with adults with learning disabilities

---

# Development of the knowledge and skills Framework on psychological interventions for practitioners working with adults with learning disabilities

The development of this Framework was informed by a range of information sources. Project staff completed a literature review in relation to education and training of practitioners in psychological interventions with adults with learning disabilities. Related knowledge and skills Frameworks were reviewed, in particular the NES Frameworks [Promoting Excellence](#) (Dementia), [Optimising Outcomes](#) (Autism Spectrum Disorders) and [Equal Health](#) (Health Equality and Learning Disabilities). There were a series of meetings with health professional groups (psychology, nursing, psychiatry, occupational therapy, arts therapies, dietetics, physiotherapy, speech and language therapy, and clinical psychology training courses) to ascertain what their requirements for a training strategy were and these were followed up with surveys of NHS professionals (one for psychologists and the other for other professions). An initial consultation event for psychologists was held in June 2016 and a multi-professional event was held in September 2016. These events elicited feedback on the key areas to be

covered by the Framework and identified a number of individuals who were willing to act as “critical friends” in reviewing the detailed Framework Links have also been established with colleagues in NHS Education Scotland across the Psychology and Nursing Directorates and with the Keys to Life team at the Scottish Government. These discussions and events have been very influential in the design of the Framework.

At an early stage in the design process, consideration was given to the Framework being in two separate sections: one focussing on challenging behaviour, with a particular focus on Positive Behavioural Support (PBS) approaches, and the other focussing on mental health issues and psychotherapeutic approaches. However, the process of consultation led to the decision being taken to integrate these approaches into a single Framework as the separation of challenging behaviour and mental health is often a false dichotomy.

As noted in the [Psychological therapies and people who have intellectual disabilities](#) report (BPS, 2016):

“There are a number of theories regarding the relationship between mental health and challenging behaviour. These include:

- that challenging behaviour may represent an atypical presentation of mental health difficulties;
- that challenging behaviour may be a secondary feature of mental health difficulties;
- that mental health difficulties may act as establishing operations for operant-maintained challenging behaviour;
- that challenging behaviour and mental health difficulties co-occur due to an underlying biological pathology; and
- that the presence of challenging behaviour increases risk factors for the development of mental health difficulties.”

It is therefore important that practitioners have an

understanding of both challenging behaviour and mental health difficulties at an appropriate level for their role and this is reflected in the structure of the Framework.

In the development of this Framework it became clear that the [Equal Health](#) Framework developed by colleagues in the Nursing Directorate of NHS Education Scotland was going to be closely linked to this Framework. This was not only in relation to areas where “Equal Health” makes reference to psychological or mental health needs but also in relation to physical health and the rights-based approach that runs through it as these are often directly related to psychological wellbeing. This Framework should therefore be viewed as being underpinned by “Equal Health”. Where there are specific examples these are included in the text in italics to make the links explicit. The rest of the Framework provides a more detailed account of the knowledge and skills required at different levels across services to promote psychological wellbeing for adults with learning disabilities.

# How the Framework should be used

The Framework can potentially be used in a number of ways, including by:

- individual practitioners, by themselves, (in conjunction with the appropriate generic and/or professional Frameworks and guidance) to help them understand the values base, knowledge and skills they require to deliver optimal assessment, care, support and treatment with adults with learning disabilities to support psychological wellbeing
- individual practitioners, alongside their managers/supervisors, to identify their strengths and any gaps in knowledge and skills in relation to the role they are performing, which will allow both to identify and take action to address any development needs to deliver the aspirations set out in this Framework
- organisations, to ensure staff have the necessary knowledge and skills to support psychological wellbeing in adults with learning disabilities and to plan staff development activities to reflect the aspirations set out in the Framework
- organisations, to shape the design and delivery of future-focused vocational and professional undergraduate and postgraduate education and training
- adults with learning disabilities, their families and carers as an information resource to ensure they are aware of, and can exercise their rights in relation to achieving appropriate levels of assessment, care, support and treatment to promote psychological wellbeing

---

## The structure of the Framework

Each level defines the knowledge, skills and behaviours specific to the practitioner's role in relation to supporting psychological wellbeing for people with learning disabilities. Rather than being hierarchical, the levels are concerned with levels of responsibility in relation to working with adults with learning disabilities in relation to psychological wellbeing. Each level therefore defines the knowledge and skills in supporting psychological wellbeing for adults with learning disabilities specific to a practitioner's role, rather than to his or her seniority within the organisation or profession. Professional roles that typically relate to different levels of the Framework are identified in the introduction to each service level, but it is important to recognise that within some professional groups there may be individual practitioners who are qualified to work at higher levels of the Framework.

The skills outlined at each level are constructed in an incremental way where each level builds on the previous one: for example, practitioners working at

Skilled Practice Level would also possess the knowledge and skills described at Informed Practice Level and practitioners working at Specialist Practice Level would possess the knowledge and skills described at all preceding levels. Each individual practitioner and his or her employer must take responsibility for ensuring that they correctly interpret and apply the content and aspirations of the Framework in relation to their roles in working with adults with learning disabilities, their families and carers.

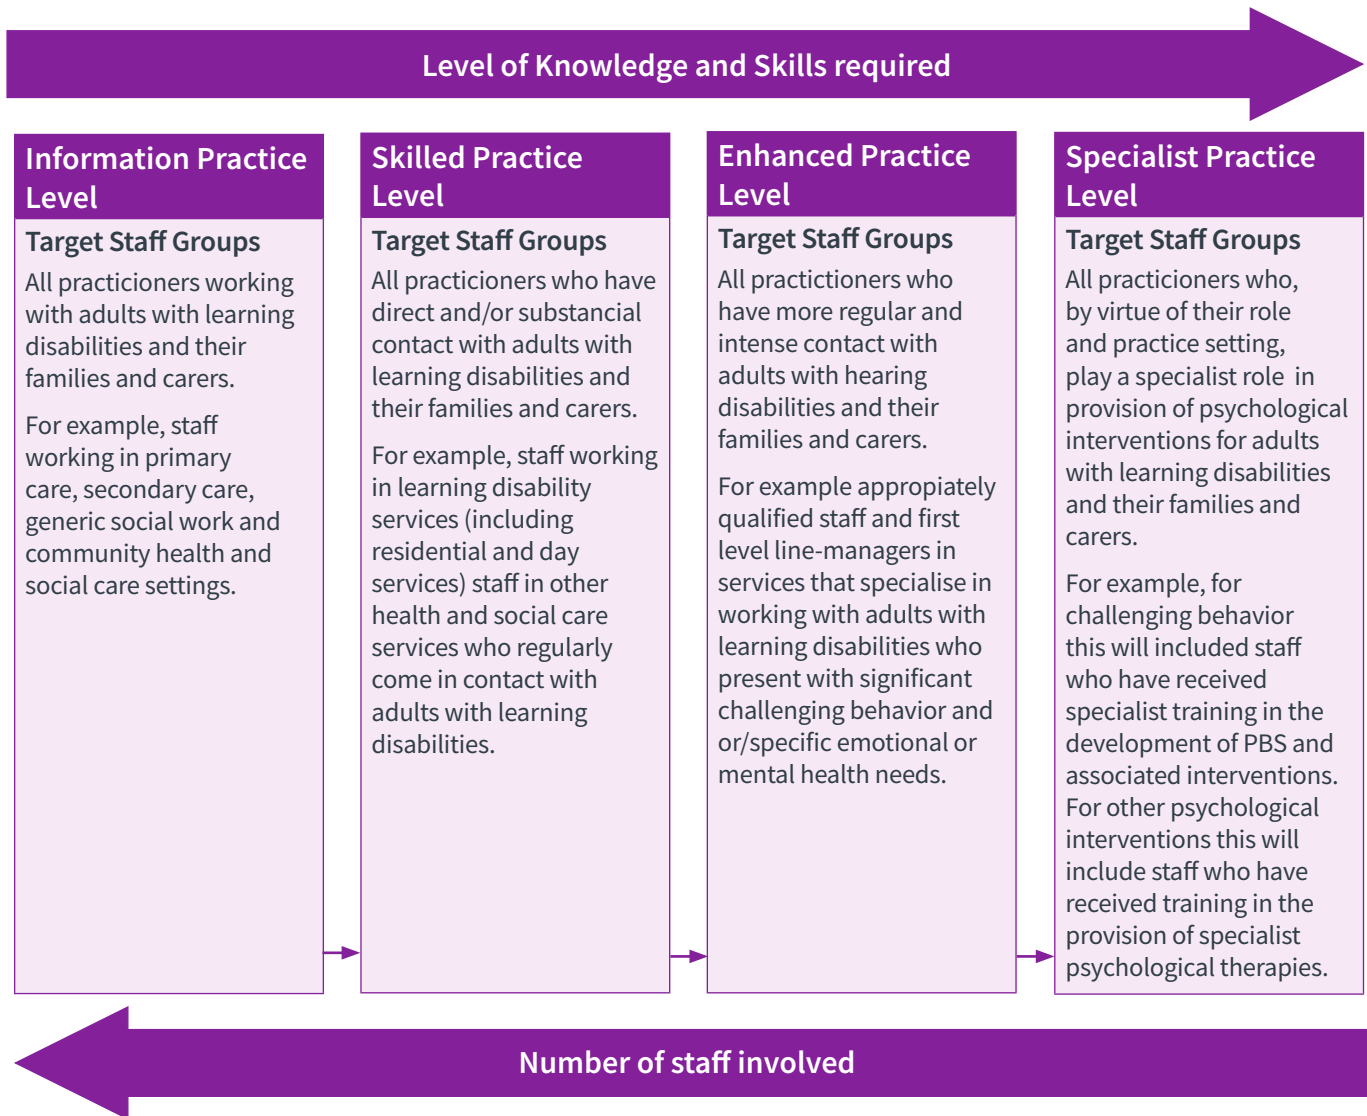

## The structure of the Framework

The **Informed Practice Level on psychological interventions for practitioners working with adults with learning disabilities** outlines the baseline knowledge and skills required by all practitioners working with adults with learning disabilities and their families and carers.

The **Skilled Practice Level on psychological interventions for practitioners working with adults with learning disabilities** outlines the knowledge and skills required by practitioners who have direct and/or substantial contact with adults with learning disabilities and their families and carers.

The **Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities** outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.

The **Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities** outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in provision of psychological interventions and therapy with adults with learning disabilities and their families and carers. It is recognised that some levels of intervention at this level may be considered to be Highly Specialist, due to the level of complexity and risk involved.

# Informed Practice Level on psychological interventions for practitioners working with adults with learning disabilities

**The Informed Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by all practitioners working with adults with learning disabilities and their families and carers.**

For example, staff working in primary care, secondary care, generic social work, education and community health and social care settings who work with adults with learning disabilities on an occasional basis.

\*Items in *italics* in this table are particularly relevant elements taken from the Informed Practice Level of the NES [Equal Health Framework](#)

**The Informed Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by all practitioners working with adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities have physical and mental health issues that may impact on their behaviour recognised by staff</b></p>	<ul style="list-style-type: none"> <li>• <i>Knowledge of individual health passports</i></li> <li>• <i>Understand the effects of fragility, adversity and isolation on people with learning disabilities</i></li> <li>• Knowledge that distress and challenging behaviour may be related to an underlying sensory problem or a physical health problem, especially those resulting in pain</li> <li>• Knowledge that challenging behaviour can be associated with mental health difficulties</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Ability to refer the person with a learning disability for physical or mental health assessments</i></li> <li>• <i>Use health passports to gain an understanding of the needs of people with learning disabilities</i></li> <li>• Ability to see the behaviour of the person as potentially reflecting physical or mental health needs rather than assume all aspects of presentation are due to learning disability</li> </ul>

The Informed Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by all practitioners working with adults with learning disabilities and their families and carers.

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p>Where there is concern that adults with learning disabilities may be distressed or displaying challenging behaviour as a result of abuse or trauma, an appropriate response is provided</p>	<ul style="list-style-type: none"><li>• <i>Understand that people with learning disabilities may be at risk of experiencing neglect, harm or abuse – physical, sexual psychological and financial</i></li><li>• <i>Understand that legislation exists to protect the rights of people with learning disabilities and safeguard them against any potential risk or harm</i></li><li>• <i>Awareness of local adult protection protocol and policy</i></li><li>• Recognise when the physical or social environment could compromise the health and safety of adults with learning disabilities</li><li>• Understand the importance of speaking with adults with learning disabilities on their own, where appropriate</li></ul>	<ul style="list-style-type: none"><li>• <i>Recognise and respond when a person with a learning disability is experiencing neglect, harm or abuse</i></li><li>• <i>Take appropriate action according to organisational procedures when a person with a learning disability may be experiencing neglect harm or abuse</i></li><li>• Ability to use basic communication strategies to enhance communication and understanding in interactions with adults with learning disabilities</li></ul>

**The Informed Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by all practitioners working with adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities have their legal rights respected</b></p>	<ul style="list-style-type: none"> <li>• <i>Understand that legislation exists to protect the rights of people with learning disabilities and safeguard them against any potential risk or harm.</i></li> <li>• <i>Knowledge of the consent and capacity issues that may affect people with learning disabilities.</i></li> <li>• Knowledge of the principles of the Adults with Incapacity (Scotland) Act 2000</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Ability to identify when a person does not have capacity to consent</i></li> <li>• Ability to apply the principles of the Adults with Incapacity (Scotland) Act 2000 in practice</li> </ul>

**The Informed Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by all practitioners working with adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities have the potential communicative function of challenging behaviour recognised</b>	<ul style="list-style-type: none"><li>• <i>Awareness that people with learning disabilities may use alternative methods of communication</i></li><li>• Awareness that use of alternative methods of communication can support both understanding and expression and can potentially reduce the likelihood of challenging behaviour</li><li>• Awareness that challenging behaviour is less likely when the person understands and is understood by those around them</li><li>• Awareness that challenging behaviour may be a way for the person to show how they are feeling</li></ul>	<ul style="list-style-type: none"><li>• <i>Seek support and advice from professionals and family carers where there may be communication issues</i></li><li>• <i>Ability to communicate with each person with a learning disability</i></li><li>• Capacity to communicate to the individual, the family or carer that you have some understanding of their difficulties or emotions</li></ul>

**The Informed Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by all practitioners working with adults with learning disabilities and their families and carers.**

<b>Outcome</b>	<b>What practitioners know (knowledge)</b>	<b>What practitioners are able to do (capability/skill/ability)</b>
<b>Adults with learning disabilities have the potential communicative function of challenging behaviour recognised (continued)</b>	<ul style="list-style-type: none"><li>Awareness that challenging behaviour may arise in situations where the person is feeling anxious, distressed or excited</li></ul>	<ul style="list-style-type: none"><li>Ability to respond to challenging behaviour by facilitating alternative forms of communication</li></ul>

**The Informed Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by all practitioners working with adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities experience services that have made reasonable adjustments to reduce likelihood of challenging behaviour or distress occurring</b>	<ul style="list-style-type: none"><li>• <i>Knowledge of the organisational barriers and aspects of their own practice that could cause restrictions for a person with a learning disability accessing services</i></li><li>• Recognition that the adult with a learning disability, families and carers can provide advice on appropriate adjustments</li></ul>	<ul style="list-style-type: none"><li>• <i>Ability to seek support and guidance to overcome barriers and make reasonable adjustments</i></li><li>• <i>Ability to make reasonable adjustments in relation to accessing services</i></li><li>• Capacity to describe to the individual, where appropriate, using accessible communication, the purpose of the interaction, the process and possible outcome</li><li>• Capacity to make adjustments to practice and/or the environment to meet the needs of individuals and families/carers</li></ul>

**The Informed Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by all practitioners working with adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities receive an appropriate response from staff when presenting with distressed or challenging behaviour</b></p>	<ul style="list-style-type: none"> <li>• <i>Knowledge of how to respond to a person with a learning disability who exhibits behaviours that are perceived as challenging</i></li> <li>• Knowledge of how to respond to a person with a learning disability who is distressed</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Interact with people with learning disabilities, their families and carers in a way that recognises their wishes and priorities</i></li> <li>• <i>Recognise when a person with a learning disability exhibits behaviours that are perceived as challenging and respond appropriately</i></li> <li>• Capacity to recognise when the situation needs to be managed by a carer or other staff member, familiar to the individual with greater knowledge of how best to respond</li> </ul>

**The Informed Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by all practitioners working with adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities have their mental health needs recognised</b>	<ul style="list-style-type: none"><li>• <i>Awareness of the importance of physical and mental health assessments</i></li><li>• Understand that a significant number of adults with learning disabilities also have mental health problems</li></ul>	<ul style="list-style-type: none"><li>• Recognise that adults with learning disabilities may find it difficult to:<ul style="list-style-type: none"><li>• Explain how they feel</li><li>• Describe the development and “history” of their symptoms</li><li>• Identify events or factors that may have contributed to their difficulties, such as a change in carers, bereavement or abuse</li></ul></li></ul>

**The Informed Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by all practitioners working with adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities are assisted to access support, advice and/or treatment for psychological needs</b></p>	<ul style="list-style-type: none"> <li>• <i>Awareness of the role of other professionals and family carers who can support the active engagement of the person with learning disabilities in community life and valued activities</i></li> <li>• Knowledge of local and national sources of information and support where individuals and their families or carers can access additional psychological information or advice</li> <li>• Knowledge of how to access local community information and services that can provide psychological support for adults with learning disabilities and their families</li> <li>• Awareness of referral routes for specialist health, social work and third sector support in relation to psychological issues</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Ability to refer the person with a learning disability for physical or mental health assessments</i></li> <li>• <i>Ability to seek support and guidance to overcome barriers and make reasonable adjustments</i></li> </ul>

# Skilled Practice Level on psychological interventions for practitioners working with adults with learning disabilities

**The Skilled Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by all practitioners who have direct and/or substantial contact with adults with learning disabilities and their families and carers.**

For example, staff working in learning disability services (including residential and day services), staff in other health and social care services who regularly come in contact with adults with learning disabilities (which will include acute services with high usage by people with learning disabilities). Staff at this level will most often apply/support psychological interventions designed by others.

\*Items in *italics* in this table are particularly relevant elements taken from the Informed Practice Level of the NES [Equal Health Framework](#)

**The Skilled Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by all practitioners who have direct and/ or substantial contact with adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities receive support from staff who have understanding of the causation of challenging behaviour and mental health issues</b></p>	<ul style="list-style-type: none"> <li>• <i>Understand the implications of the results of physical and mental health assessments</i></li> <li>• <i>Understand the ways in which the impact of environmental challenges can result in frustration and distress</i></li> <li>• <i>Understanding of the effects of neglect, harm or abuse</i></li> <li>• Understand that challenging behaviour is best understood as learned behaviour that relates directly to antecedent events and reinforcing consequences (i.e. what happened before the behaviour and what happened afterwards)</li> </ul>	<ul style="list-style-type: none"> <li>• Ability to identify the environmental variables associated with challenging behaviour and mood for the person</li> <li>• Ability to recognise communication difficulties and to adjust communication accordingly</li> <li>• Ability to understand that their own behaviour can influence how a person feels and behaves and adjust their behaviour accordingly</li> <li>• Ability to interact with adults with learning disabilities in a manner that supports their emotional wellbeing</li> </ul>

**The Skilled Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by all practitioners who have direct and/ or substantial contact with adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities receive support from staff who have understanding of the causation of challenging behaviour and mental health issues (continued)</b>	<ul style="list-style-type: none"><li>• Understand that challenging behaviour is less likely</li><li>• when a person is doing things they have chosen to do or with people they have chosen to be with</li><li>• in the absence of environmental pollutants (e.g. excessive noise)</li><li>• when an individual is healthy and not in pain or discomfort</li><li>• when the person is meaningfully occupied</li><li>• when the person is with family members or others with whom they have positive relationships</li></ul> and more likely <ul style="list-style-type: none"><li>• when the person is supported inconsistently</li><li>• when in transition between one environment and another</li></ul>	

**The Skilled Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by all practitioners who have direct and/ or substantial contact with adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities receive support from staff who have understanding of the causation of challenging behaviour and mental health issues (continued)</b></p>	<ul style="list-style-type: none"> <li>• Understand that behaviour happens for a reason and that our collective role is to understand what that reason is</li> <li>• Understand that when people find it hard to explain or understand their feelings and thoughts, it can be particularly difficult for them to report symptoms of psychological distress</li> </ul>	

## Supporting psychological wellbeing in adults with learning disabilities

<p><b>Adults with learning disabilities are supported by staff who make a positive contribution to monitoring and reporting on challenging behaviour and mental health issues (continued)</b></p>	<ul style="list-style-type: none"> <li>• Understand what aspects of behaviour and mental health should be recorded as part of regular record keeping and those which should be reporting distinctly</li> <li>• Understand how to describe an individual’s physical and emotional state from non-verbal behaviours (i.e. facial expression, body movements, other behaviour)</li> <li>• Understand how to record and report changes in behaviour and mental health according to agreed procedures</li> <li>• Understand the importance of raising concerns at an early stage</li> </ul>	<ul style="list-style-type: none"> <li>• Ability to identify and report obstacles to achieving desired outcomes</li> <li>• Ability to provide feedback on what is working well and what could be working better</li> <li>• Ability to observe behaviour and other indicators of emotional state and to report this accurately</li> </ul>

## Supporting psychological wellbeing in adults with learning disabilities

Skilled Practice Level on psychological interventions for practitioners working with adults with learning disabilities

---

**The Skilled Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by all practitioners who have direct and/ or substantial contact with adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities are assisted to access enhanced or specialist support, advice and/or treatment for psychological needs</b>	<ul style="list-style-type: none"><li>• <i>Awareness of specialist services and professionals that support/ enable access to a range of appropriate and therapeutic activities</i></li><li>• <i>Knowledge of the services and supports that can help people with learning disabilities, their families and carers to maintain valued activities, social engagement and inclusion</i></li><li>• Knowledge of range of services available locally to support psychological needs</li></ul>	<ul style="list-style-type: none"><li>• <i>Ability to make referrals to specialist learning disability services</i></li><li>• Capacity to identify need for onward referral to higher level services and initiate this within service setting</li></ul>

**The Skilled Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by all practitioners who have direct and/ or substantial contact with adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities who display challenging behaviour are supported by staff who meet the “Direct Contact Competencies” highlighted in the PBS Competence Framework</b></p>	<ul style="list-style-type: none"> <li>• A very detailed set of competencies in Positive Behavioural Support for direct care staff is detailed in the PBS Coalition document “Positive Behavioural Support (PBS): A Competence Framework” which is available at <a href="http://pbsacademy.org.uk/pbs-competence-Framework/">http://pbsacademy.org.uk/pbs-competence-Framework/</a>. The structure of this Framework is shown at Appendix 2.</li> <li>• The only adaptation required for this to apply in a Scottish context is that section 1.1 “Knowing and understanding relevant legislation” would need to be adapted to note that 1) The Adults with Incapacity (Scotland) Act 2000 will apply instead of the Mental Capacity Act, 2) There is no direct Scottish equivalent for the Deprivation of Liberties Safeguards (DOLs), 3) The relevant mental health act is the Mental Health (Care and Treatment) (Scotland) Act 2003, and 4) Best interests decisions are not part of the Adults with Incapacity (Scotland) Act 2000 – the closest element is the principle that “Any action or decision taken must benefit the person and only be taken when that benefit cannot reasonably be achieved without it”.</li> </ul>	

# Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

For example, appropriately qualified professional staff and first level line-managers in services that specialise in working with adults with learning disabilities who present with significant challenging behaviour and/or specific emotional or mental health needs. These are staff who will be taking an active role in the development of treatment design and implementation (in the absence of complex presentations). Some will be in a position where they can lead on the creation of environments and opportunities that provide a recovery focus for adults with learning disabilities and associated mental health needs or challenging behaviour. Line managers will provide guidance and professional supervision to ‘skilled practice’ staff as appropriate to role.

\*Items in *italics* in this table are particularly relevant elements taken from the Informed Practice Level of the NES [Equal Health Framework](#)

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities receive appropriate assessment of challenging behaviour and/or of mental health needs (does not include those with complex or high-risk behaviour)</b></p>	<ul style="list-style-type: none"> <li>• <i>Detailed knowledge and understanding that behaviours perceived as challenging are often an expression of unmet need</i></li> <li>• <i>In-depth knowledge of the different forms of learning disability and the particular implications and impact on the person, family and carers</i></li> <li>• <i>Knowledge of how to conduct assessments of physical and mental health</i></li> <li>• <i>Knowledge of how to interpret the results of physical and mental health assessments</i></li> <li>• Knowledge of a range of functional assessment tools and their strengths and limitations</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Ability to assess the impact of the learning disability</i></li> <li>• Ability to adopt an outcomes-based approach, building on peoples existing capabilities when assessing support needs</li> <li>• Capacity to engage with the individual presenting for assessment</li> <li>• Capacity to gather and integrate relevant family history</li> </ul>

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities receive appropriate assessment of challenging behaviour and/or of mental health needs (does not include those with complex or high-risk behaviour) (continued)</b>	<ul style="list-style-type: none"><li>• Knowledge of screening measures for mental health difficulties for use with adults with learning disabilities and their strengths and limitations</li><li>• Detailed knowledge and understanding that distressed behaviours perceived as being challenging are often an expression of unmet needs</li><li>• Knowledge and understanding of potential causes and signs of stress and distress for the person, their family and carers</li><li>• Knowledge of evidence-based approaches and techniques for assessing neglect and abuse and appropriate responses</li></ul>	<ul style="list-style-type: none"><li>• Capacity to identify and assess support and intervention needs in the context of complexity of presentation and systems</li><li>• Capacity to identify and interpret other relevant sources of information to support the assessment</li><li>• Capacity to identify appropriate adjustments to the assessment process, location or environment necessary to facilitate a successful assessment</li><li>• Capacity to work out the individual's difficulties by observing and analysing behaviour when verbal communication is limited or unclear</li></ul>

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities receive appropriate assessment of challenging behaviour and/or of mental health needs (does not include those with complex or high-risk behaviour) (continued)</b></p>	<ul style="list-style-type: none"> <li>• Knowledge of the signs of common mental and physical health problems for adults with learning disabilities</li> <li>• Knowledge of the potential importance of specific causes of learning disability (including specific syndromes) in relation to mental health and behavioural presentation</li> <li>• Knowledge of the benefit of including a communication profile in assessment reports</li> <li>• Knowledge that physical health needs are very important within assessment and can be interrelated with behaviour and mental health.</li> </ul>	<ul style="list-style-type: none"> <li>• Competent to adapt the questions or approach where necessary to enable participation in the assessment and completion of the assessment</li> <li>• Ability to recognise when an adult with learning disabilities may be experiencing mental health problems</li> <li>• Ability to take a person-centred approach to assessing distressed behaviour which may be perceived as challenging</li> <li>• Ability to assess the person's individual and family history, health needs, communication preferences, preferred activities/ items, likes/dislikes, skills and abilities</li> </ul>

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

<b>Outcome</b>	<b>What practitioners know (knowledge)</b>	<b>What practitioners are able to do (capability/skill/ability)</b>
<b>Adults with learning disabilities receive appropriate assessment of challenging behaviour and/or of mental health needs (does not include those with complex or high-risk behaviour) (continued)</b>	<ul style="list-style-type: none"><li>• Knowledge of specific syndromes and conditions that may indicate behavioural profiles</li><li>• Understand the importance of obtaining assessment information from observation and talking to family and paid carers</li><li>• Understand the possible impact of adverse life events on mental health and behaviour (e.g. historic abuse, neglect or current poverty and social isolation etc.)</li><li>• Knowledge of the relevant assessment tools to assess preference and motivation</li><li>• Knowledge of the relevant assessment tools to determine skill and ability levels</li></ul>	<ul style="list-style-type: none"><li>• Ability to provide clearly written information in a report format outlining the nature of the assessment, the outcome and indicating next steps</li><li>• Ability to use and interpret appropriate assessment tools to determine current preferences</li></ul>

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities receive appropriate assessment of challenging behaviour and/or of mental health needs (does not include those with complex or high-risk behaviour) (continued)</b></p>	<ul style="list-style-type: none"> <li>• Knowledge of the importance of identifying factors that trigger and perpetuate challenging behaviour or mental wellbeing</li> <li>• Understand the benefit of using a range of assessment tools to compensate for weaknesses in individual measures (e.g. semi-structured interviews, rating scales, reviewing recordings, direct observation strategies, triangulation of data)</li> <li>• Understand the impact that pharmacological interventions may have on a person’s presentation</li> <li>• Knowledge of the contributions of specialist staff to a thorough assessment</li> </ul>	

The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities are supported by staff who are knowledgeable about relevant legislation</b>	<ul style="list-style-type: none"><li>• <i>Detailed knowledge of the principles and key provisions of legislation such as the Human Rights Act 1998, Mental Health (Care and Treatment) (Scotland) Act 2003, Adults with Incapacity Act 2000, Adult Support and Protection Act 2007 and the Equalities Act 2010.</i></li><li>• <i>Understand the requirements of appropriate current legislation on informed consent, confidentiality and advance planning and the implications for the person with a learning disability and his or her family and carers.</i></li></ul>	<ul style="list-style-type: none"><li>• <i>Actively support people with learning disabilities, their families and carers to understand the legal Frameworks that support choice and decision-making.</i></li><li>• <i>Apply the principles and key provisions of legislation to safeguard people with learning disabilities.</i></li><li>• <i>Actively support the person with a learning disability and his or her family and carers to implement legal aspects regarding informed consent, confidentiality and advance planning.</i></li><li>• <i>Actively seek the person's consent before any intervention is carried out.</i></li></ul>

The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p>Adults with learning disabilities are supported by staff who are knowledgeable about relevant legislation (continued)</p>	<ul style="list-style-type: none"> <li>• <i>Knowledge of the principles of determining capacity in any given situation.</i></li> <li>• <i>Understand how human rights legislation can contribute to person-centred planning for people with learning disabilities.</i></li> <li>• <i>Knowledge of appropriate current legislation on informed consent and confidentiality.</i></li> <li>• <i>Knowledge of the elements of relevant legislation that can support people with learning disabilities, such as power of attorney, guardianship and advocacy.</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>Ascertain whether the person with a learning disability has a guardian or attorney appointed</i></li> <li>• <i>Refer for assessment when no guardian or attorney has been appointed.</i></li> <li>• <i>Actively support the person with a learning disability to maximise his or her ability to communicate needs, wishes and desires.</i></li> <li>• <i>Provide information for the person with a learning disability, family and carers about the ongoing implications for them of legislation regarding informed consent, guardianship, power of attorney and advocacy.</i></li> </ul>

<b>Outcome</b>	<b>What practitioners know (knowledge)</b>	<b>What practitioners are able to do (capability/skill/ability)</b>
<b>Adults with learning disabilities have care plans to support mental health needs that are developed, implemented and evaluated on an individual basis (continued)</b>	<ul style="list-style-type: none"><li>• Knowledge of how to describe personally important outcomes for individuals that are observable, measurable, and timely</li><li>• Knowledge of importance of ensuring goals relating to relationships with family, friends and the wider community are prominent in person-centred planning and implementation</li><li>• Knowledge of the importance of the individual being able to contribute to their care plan and being enabled to make choices in relation to short, medium and long term goals</li></ul>	<ul style="list-style-type: none"><li>• Ability to use a combination of different levels of intervention, based on individual needs, to promote wellbeing and alleviate distress</li></ul>

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities have care plans to support mental health needs that are developed, implemented and evaluated on an individual basis (continued)</b></p>	<ul style="list-style-type: none"> <li>• Understand the importance of identifying and focusing on outcomes that are important to the person with learning disabilities</li> <li>• Knowledge of the importance of positive activities and opportunities as part of a care plan in relation to mental health needs</li> <li>• Understand the emotional complexities that can be associated with future planning</li> <li>• Understand the importance of risk enablement in care planning</li> </ul>	

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities receive individualised advice to support and promote mental wellbeing</b>	<ul style="list-style-type: none"><li>• <i>In-depth knowledge of the importance of physical activity for people with learning disabilities</i></li><li>• <i>In-depth knowledge of the range of multi-sensory, therapeutic, recreational and active support activities that promote wellbeing and independence</i></li><li>• <i>Understand the range of environmental and person-centred approaches that can promote wellbeing for people with learning disabilities</i></li><li>• <i>Understand the range of multi-sensory stimulation, recreational activities and combined therapies that promote wellbeing and alleviate distress in people with learning disabilities</i></li></ul>	<ul style="list-style-type: none"><li>• <i>Engage with people with learning disabilities, their families and carers to inform them about the importance of physical activity</i></li><li>• <i>Implement and evaluate therapeutic, recreational and active support activities</i></li><li>• <i>Proactively intervene to support people with learning disabilities, their families and carers to manage stress and avert distress</i></li><li>• <i>Creatively use a combination of different levels of intervention, based on individual needs, to promote wellbeing and alleviate distress</i></li></ul>

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities receive individualised advice to support and promote mental wellbeing (continued)</b></p>	<ul style="list-style-type: none"> <li>• In-depth knowledge of easy read and accessible materials regarding mental health and/or behaviour change that are designed for use with adults with learning disabilities</li> <li>• Knowledge that helping a person develop their ‘emotional vocabulary’ and insight into their own cognitive process can increase their potential to benefit from psychological interventions</li> </ul>	<ul style="list-style-type: none"> <li>• Ability to assist people with learning disabilities to identify and use accessible self-help materials</li> <li>• Ability to assist individuals to reflect on their thoughts and feelings and how to describe and understand them</li> </ul>

The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities receive psychological interventions for discrete mental health issues from staff who are appropriately trained</b>	<ul style="list-style-type: none"><li>• <i>Knowledge of evidence-based, solution-focused psychological interventions</i></li><li>• Where appropriately qualified, knowledge of CBT self-help strategies delivered to an established protocol</li><li>• Where appropriate to role, knowledge of established models of group intervention such as standardised small-scale anxiety management groups, group-based social learning programmes and anger management groups to protocol</li></ul>	<ul style="list-style-type: none"><li>• Ability to facilitate groupwork</li><li>• Ability to run groups according to agreed protocols</li><li>• Where appropriately qualified, ability to use protocol-based interventions in accordance with practice requirements (e.g. Behavioural Family Therapy)</li><li>• Ability to encourage and motivate adults with learning disabilities to actively participate in psychological interventions</li><li>• Capacity to provide dedicated time to specific interventions</li></ul>

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities receive psychological interventions for discrete mental health issues from staff who are appropriately trained</b></p>	<ul style="list-style-type: none"> <li>• Where appropriately qualified, provision of psychological interventions to agreed protocols (e.g. Behavioural Family Therapy)</li> <li>• Understanding of the potential importance of the family or carers in facilitating therapeutic gain</li> </ul>	<ul style="list-style-type: none"> <li>• Ability to develop a therapeutic relationship</li> <li>• Ability to adjust communication to the appropriate level for individuals and to review effectiveness of this</li> <li>• Ability to engage others (such as families and carers) in supporting the therapeutic process, where appropriate</li> </ul>

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities are supported by staff who are competent in data analysis</b>	<ul style="list-style-type: none"><li>• Knowledge of how to apply data collection procedures to evaluate goals in the Behaviour Support Plan or in therapy</li><li>• Understanding of the information that different types of data source provide</li><li>• Knowledge of the strengths and weaknesses of different forms of data collection and the appropriate methods for the behaviour/issue in question</li><li>• Knowledge of how to summarise and provide a descriptive analysis of monitoring data</li><li>• Understanding of how on-going data can be incorporated into a Behaviour Support Plan (as a live document) or in informing adjustment to a particular therapeutic approach</li></ul>	<ul style="list-style-type: none"><li>• Ability to adjust the Behaviour Support Plan based on evaluation data gathered</li><li>• Ability to summarise and provide descriptive analysis of outcome data</li><li>• Ability to interpret data within the context of an agreed monitoring strategy</li><li>• Ability to balance the relative significance of data from a range of sources</li></ul>

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities are supported by staff who ensure good records are kept about them</b></p>	<ul style="list-style-type: none"> <li>• Understanding of the importance of accurate record keeping in relation to psychological interventions</li> <li>• Understanding of the importance of auditing effectiveness of therapeutic interventions</li> <li>• Knowledge of the level of recording that is necessary to inform the implementation of Behaviour Support Plans or other therapeutic interventions</li> </ul>	<ul style="list-style-type: none"> <li>• Ability to record and report accurately in relation to behaviour, observed emotional state and associated factors</li> <li>• Ability to record variance from agreed approaches</li> <li>• Competence in administering and recording of all relevant aspects of an individual’s presentation</li> <li>• Ability to support and promote accurate recording by others</li> <li>• Ability to challenge when appropriate levels of recording are not in place</li> </ul>

## Supporting psychological wellbeing in adults with learning disabilities

Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities are supported by staff who can monitor and report on challenging behaviour and mental health</b>	<ul style="list-style-type: none"><li>• <i>In-depth knowledge of how care plans are reviewed</i></li><li>• Understanding of the infrastructure and processes that need to be in place in order to support the cycle of assessment, intervention, monitoring and evaluation (this includes outcomes in relation to Behaviour Support Plans and a range of other therapeutic approaches)</li><li>• Knowledge of how to make, and facilitate the making of, data-based decisions</li><li>• Knowledge of range and applicability of structured observations of behaviour</li></ul>	<ul style="list-style-type: none"><li>• <i>Ability to implement and evaluate established care pathways</i></li><li>• <i>Ability to review care plans and care pathways</i></li><li>• <i>Use a range of assessment strategies to identify changes in the person's emotional wellbeing</i></li><li>• Ability to ensure appropriate paperwork is completed by self and others</li><li>• Ability to make clear the link between the data collected and the decision-making process and ensure that the team understand this relationship</li></ul>

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p>Adults with learning disabilities are supported by staff who can monitor and report on challenging behaviour and mental health (continued)</p>		<ul style="list-style-type: none"> <li>• Ability to identify and report obstacles to successfully delivering behavioural or emotional change</li> <li>• Ability to develop mechanism for monitoring outcome of interventions and support which focus on positive outcomes and which take individual difference into account</li> <li>• Ability to select appropriate measures that evaluate outcome variables at an individual, group and organisational level</li> <li>• Ability to interpret data within the context of an agreed monitoring strategy</li> </ul>

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities have their psychological support outcomes evaluated to agreed standards</b>	<ul style="list-style-type: none"><li>• <i>Understand the importance of evaluating personal outcomes</i></li><li>• <i>Understand the importance of identifying and focusing on outcomes that are important to the person with a learning disability</i></li><li>• <i>Understand the principles, approaches and practices that promote outcomes-and asset-focused approaches to care of people with learning disabilities</i></li><li>• Knowledge of how to describe personally important outcomes for individuals that are observable, measurable, and timely</li></ul>	<ul style="list-style-type: none"><li>• <i>Engage with the person with a learning disability to establish the outcomes that are important to him or her, and support him or her to prioritise and achieve these outcomes</i></li><li>• <i>Undertake person-centred assessments focused on the outcomes for the person with a learning disability</i></li><li>• Ability to develop mechanisms for monitoring outcome of interventions and support which focus on positive outcomes and which take individual fluctuations in presentation into account</li></ul>

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities have their psychological support outcomes evaluated to agreed standards (continued)</b></p>	<ul style="list-style-type: none"> <li>• Understanding that participation in everyday activity is a key outcome for many adults with learning disabilities</li> <li>• Knowledge of how to summarise, analyse and report outcome data</li> <li>• Knowledge of systematic audit models such as Quality Improvement methodology and Periodic Service Review</li> </ul>	<ul style="list-style-type: none"> <li>• Ability to identify and report obstacles to successfully delivering Behaviour Support Plans or other interventions</li> <li>• Ability to measure participation in meaningful activities and community engagement</li> <li>• Ability to summarise, analyse and report outcome data</li> </ul>

## Supporting psychological wellbeing in adults with learning disabilities

Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities

---

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities have support from staff who are competent in supervision of the staff they manage</b>	<ul style="list-style-type: none"><li>• Knowledge of how to provide practice supervision in relation to appropriate psychological interventions according to agreed professional practice</li></ul>	<ul style="list-style-type: none"><li>• Ability, where appropriately trained, to provide practice supervision to staff in relation to implementation of Behaviour Support Plans and other care plans</li><li>• Ability, where appropriately trained, to provide direct coaching to others in implementation of strategies and provide regular performance feedback</li><li>• Ability to reflect on and support others to reflect on personal experience when implementing strategies, particularly when implementing reactive strategies</li></ul>

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p>Adults with learning disabilities have support from staff who are competent in supervision of the staff they manage (continued)</p>		<ul style="list-style-type: none"> <li>• Ability to ensure that all members of the support team understand and are able to accurately implement each Behaviour Support Plan</li> <li>• Ability to provide verbal and written feedback on an individual and team basis</li> <li>• Ability to facilitate regular team meetings to review and update support plans, gain staff feedback, and involve staff in decision-making</li> <li>• Ability to manage difficulties within supervision or identified through supervision</li> </ul>

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

<b>Outcome</b>	<b>What practitioners know (knowledge)</b>	<b>What practitioners are able to do (capability/skill/ability)</b>
<b>Adults with learning disabilities have support from staff who participate in appropriate levels of supervision for their own practice</b>	<ul style="list-style-type: none"><li>• Understanding of the importance, and benefit, of supervision in relation to own practice in provision of psychological interventions</li><li>• Understanding of the benefit of supervision being informed by routine outcome measures</li></ul>	<ul style="list-style-type: none"><li>• Capacity to regularly attend and actively participate in supervision and review meetings</li><li>• Ability to utilise supervision to develop own practice and skills</li><li>• Ability to utilise supervision to improve quality of psychological interventions for individuals</li><li>• Ability to reflect on ethical practice, adherence to protocol, progress in treatment and elements of the therapeutic relationship in supervision</li><li>• Ability to participate in supervision on an individual or group basis</li></ul>

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities are assisted to access specialist support, advice and/or treatment for psychological needs</b></p>	<ul style="list-style-type: none"> <li>• <i>Detailed knowledge of local services and specialists, their roles and functions</i></li> <li>• Knowledge of individual behaviours and presentations that may alert staff to consider referral for specialist advice and or treatment (e.g. autism assessment, genetic screening, neuropsychological assessment, psychiatric assessment etc.)</li> <li>• Understanding of level of complexity or risk that should trigger referral to specialist level of service</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Refer to services and specialists as required</i></li> <li>• Ability to recognise when additional specialist supervision or support is required to support an intervention</li> <li>• Ability to recognise when the complexity of presentation, or level of risk, is such that referral to specialist professionals is appropriate</li> <li>• Ability to present relevant information to specialist professionals</li> </ul>

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities who display challenging behaviour are supported by staff who meet the “Behaviour Specialist/Supervisory/Managerial Competencies” highlighted in the PBS Competence Framework</b>	<ul style="list-style-type: none"><li>A very detailed set of competencies in Positive Behavioural Support for behaviour specialist/supervisory/managerial staff is detailed in the PBS Coalition document “Positive Behavioural Support (PBS): A Competence Framework” which is available at <a href="http://pbsacademy.org.uk/pbs-competence-Framework/">http://pbsacademy.org.uk/pbs-competence-Framework/</a>.</li></ul>	

**The Enhanced Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who have more regular and intense contact with adults with learning disabilities and their families and carers, provide specific interventions, and/or direct/manage care and services.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adult with learning disabilities receive psychological interventions from staff who have generic therapeutic competencies</b></p>	<ul style="list-style-type: none"> <li>To apply face-to-face psychological interventions staff should be able to meet the generic therapeutic competencies as defined in the UCL competence Framework as provided at <a href="https://www.ucl.ac.uk/pals/research/clinical-educational-and-health-psychology/research-groups/core/competence-frameworks">https://www.ucl.ac.uk/pals/research/clinical-educational-and-health-psychology/research-groups/core/competence-frameworks</a>. This provides detailed competencies under the following headings:                             <ul style="list-style-type: none"> <li>Knowledge and understanding of mental health problems</li> <li>Knowledge of, and ability to operate within, professional and ethical guidelines</li> <li>Knowledge of a model of therapy, and the ability to understand and employ the model in practice</li> <li>Ability to engage client</li> <li>Ability to foster and maintain a good therapeutic alliance, and to grasp the client’s perspective and ‘world view’</li> <li>Ability to manage emotional content of sessions</li> <li>Ability to manage endings</li> <li>Ability to undertake generic assessment (relevant history and identifying suitability for intervention)</li> <li>Ability to make use of supervision</li> </ul> </li> </ul>	

# Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

For example, for challenging behaviour, this will include staff who have received specialist training in the development of PBS and associated interventions, (i.e. applied psychologists or other professionals with appropriate additional qualifications). This level will also include appropriately qualified professional leads/senior managers of specialist challenging behaviour services as there are two elements operating at this level: 1. Staff who are responsible for assessment, formulation, development and monitoring of individualised Behaviour Support Plans for adults with learning disabilities who present with complex challenging behaviours. 2. Staff who are responsible for service design and ensuring that environments and lifestyle opportunities are managed appropriately to reduce the likelihood of challenging behaviour and that staff are managed to apply Behaviour Support Plans effectively. Some staff will fulfil both of these roles. Staff in these roles should also be responsible for supervision commensurate with the role. Provision of highly specialist psychological intervention for challenging behaviour for people with very complex needs or whose behaviour is very high-risk is most likely to be provided by applied psychologists who specialise in working with people with learning disability.

For other psychological interventions, this will include staff who have received training in the provision of specialist psychological therapies (i.e. applied psychologists, arts therapists or other professionals with appropriate specialist qualifications). Provision of highly specialist psychological therapy for people with very complex needs, or whose associated behaviour is very high-risk, is most likely to be provided by applied psychologists who specialise in working with people with learning disability.

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

\*Items in *italics* in this table are particularly relevant elements taken from the Specialist Practice Level of the NES [Equal Health Framework](#)

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities who have complex or high-risk, challenging behaviours receive appropriate assessment</b></p>	<ul style="list-style-type: none"> <li>• <i>Comprehensive knowledge and understanding that behaviours perceived as challenging are often an expression of unmet needs</i></li> <li>• <i>Comprehensive knowledge of approaches that promote multi-disciplinary assessment and interventions to support people with learning disabilities with behaviours perceived as challenging.</i></li> <li>• <i>Comprehensive knowledge of how a person with a learning disability communicates pain or distress.</i></li> <li>• <i>Comprehensive knowledge of physical and mental health assessments</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>Advise on the use of a range of person-centred assessment approaches</i></li> <li>• <i>Instigate and involve others in conducting and following-up physical and mental health assessments</i></li> <li>• Ability to develop a comprehensive psychological formulation informed by assessment</li> <li>• Capacity to identify if the individual presents with additional complex behaviours and needs</li> </ul>

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities who have complex or high-risk, challenging behaviours receive appropriate assessment (continued)</b>	<ul style="list-style-type: none"><li>• <i>Comprehensive knowledge of the different forms of learning disability and the particular implications and impact on the person, family and carers</i></li><li>• <i>Expert knowledge and understanding of the complexity of interactions and potential conflicts that arise which may compromise the wishes of the person with a learning disability</i></li><li>• <i>Expert knowledge of specific assessment tools and techniques</i></li><li>• Expert knowledge of functional analysis</li><li>• Knowledge of a range of risk assessment methods</li></ul>	<ul style="list-style-type: none"><li>• Capacity to identify risk: To record, act on or pass this information in line with local operational policy<ul style="list-style-type: none"><li>• Self-harm</li><li>• A history of rapid escalation of problems</li><li>• Harm to others</li><li>• Self-neglect</li><li>• Breakdown of support systems</li><li>• Exploitation or abuse by others</li></ul></li><li>• Competence in using clinical judgement in the process of integrating material from observation, research, clinical tools and interviews</li></ul>

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities who have complex or high-risk challenging behaviours receive appropriate assessment (continued)</b></p>	<ul style="list-style-type: none"> <li>• Knowledge that a comprehensive psychological formulation in relation to behaviour may need to take account of lots of information including:                             <ul style="list-style-type: none"> <li>• Communication skills</li> <li>• Level of ability</li> <li>• Life experiences, such as living in a long-stay hospital or experience of bereavement</li> <li>• Mental health history</li> <li>• Behavioural history</li> <li>• Sensory issues</li> <li>• Physical and neurological issues</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Ability to complete functional assessment incorporating all variables of the person, environment, staff team and organisation</li> <li>• Ability to conduct and support experimental functional analysis where this is indicated to derive functional hypotheses</li> <li>• Ability to demonstrate triangulation and synthesising of assessment outcomes to develop a clear hypothesis</li> <li>• Ability to produce and communicate assessment results in an accessible form that enables supervisory and direct support staff to integrate findings into support plans</li> </ul>

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

<b>Outcome</b>	<b>What practitioners know (knowledge)</b>	<b>What practitioners are able to do (capability/skill/ability)</b>
<b>Adults with learning disabilities who have complex or high-risk challenging behaviours receive appropriate assessment (continued)</b>	<ul style="list-style-type: none"><li>• Relationships</li><li>• Relationships with staff</li><li>• Meaningful activities</li><li>• Quality of life</li><li>• Autonomy and choice</li><li>• Financial resources</li><li>• Support from organisations' practices and philosophy</li><li>• Experiences of stigma and discrimination</li><li>• Understanding of potential differential diagnoses (e.g. ADHD, ASD, personality disorder, psychosis, dementia etc.)</li></ul>	<ul style="list-style-type: none"><li>• Ability to construct a formulation that explains the functions of a person's challenging behaviour and how it is maintained</li><li>• Ability to describe and explain each formulation to the teams involved in supporting each person with challenging behaviour</li><li>• Ability to offer staff training at all levels to help them understand the formulation</li></ul>

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities who have complex or high-risk challenging behaviours receive appropriate assessment (continued)</b></p>	<ul style="list-style-type: none"> <li>• In-depth knowledge of potential sources of stress and distress and the approaches and evidence-based interventions to support people who cannot communicate their needs</li> <li>• Knowledge of the range of changes in behaviour and communication that can signify mental health issues in adults with learning disabilities</li> <li>• Knowledge of the range of changes in behaviour and communication that can signify dementia or other neurological conditions in adults with learning disabilities</li> </ul>	<ul style="list-style-type: none"> <li>• Ability to describe how the important variables surrounding an individual and their care team, interact to produce challenging behaviour within a contingency diagram</li> <li>• Ability to use on-going preference and motivational assessments</li> <li>• Ability to use and interpret appropriate assessment tools to determine current skill levels and appropriate next steps in skill building</li> <li>• Ability to use multiple data-gathering tools to compensate for weaknesses in individual measures</li> </ul>

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities who have complex or high-risk challenging behaviours receive appropriate assessment (continued)</b>	<ul style="list-style-type: none"><li>• Knowledge of the range of syndromes and conditions that need to be considered in the assessment of adults with learning disabilities</li><li>• Understanding of the importance of having specialist behaviour analytic services to assess the functions of behaviour</li><li>• Knowledge of how to select the most effective assessment procedures and the ethics of completing functional assessment</li><li>• Knowledge of how to ethically carry out hypothesis testing</li></ul>	<ul style="list-style-type: none"><li>• Ability to use a range of functional assessment tools and support stakeholders' participation where appropriate: semi-structured interviews; rating scales; reviewing recordings; direct observation strategies; triangulation of data</li><li>• When appropriate to role, ability to carry out neuropsychological assessment</li></ul>

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities experience individualised outcome evaluation where appropriate (continued)</b></p>	<ul style="list-style-type: none"> <li>• Comprehensive knowledge of the opportunities and challenges in implementing an outcomes-based approach to provision of support for adults with learning disabilities, their families and carers</li> <li>• Comprehensive knowledge of a range of methodologies for delivering, measuring and monitoring outcomes to ensure that the needs and wishes of adults with learning disabilities, their families and carers, are met</li> </ul>	<ul style="list-style-type: none"> <li>• Ensure the continued competence of direct carers in the use of the data gathering methods</li> <li>• Explain why, in addition to being evidence-based in terms of using empirically supported methods, we must also evaluate what works for the person and what works at group and organisational levels and how to monitor outcomes organisation-wide</li> </ul>

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities experience individualised outcome evaluation where appropriate (continued)</b>	<ul style="list-style-type: none"><li>• Comprehensive knowledge of the principles and options for the application of outcomes-based approaches including a joint outcomes approach for adults with learning disabilities, their families and carers</li><li>• Understanding of the importance of practice being evidence-based at the individual, group, and organisational level, and that the only way to assess effectiveness is through systematic monitoring and evaluation at each level</li></ul>	<ul style="list-style-type: none"><li>• Ensure that there are organisation wide systems for evaluating outcome data at an individual, group and organisational level in place and are utilised within the organisation's performance management and quality assurance systems</li></ul>

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities experience individualised outcome evaluation where appropriate (continued)</b></p>	<ul style="list-style-type: none"> <li>• Knowledge of the different outcomes variables that can be measured at an individual, group of individuals, and organisational level</li> <li>• Knowledge of how to analyse outcome data at an individual/group of individuals and organisational level</li> <li>• Knowledge of the importance of the periodic auditing of systems and procedures across the organisation</li> </ul>	<ul style="list-style-type: none"> <li>• Implement personalised systems for goal-based person-centred outcome planning, implementing plans, and monitoring their impact</li> <li>• Promote the use of an outcomes-based approach which builds on adults with learning disabilities existing capabilities when assessing the support needs of adults with learning disabilities</li> </ul>

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities have support from staff who can provide clinical supervision to others</b>	<ul style="list-style-type: none"><li>• Understanding that to provide supervision for psychological therapies supervisors will be:<ul style="list-style-type: none"><li>• A qualified psychological therapist with a working knowledge of, and substantial experience in, the delivery of the intervention in which they are providing supervision</li></ul></li><li>and</li><li>• will have training which equips them with the ‘Skills for Health’ supervision competences (as detailed in <a href="#">The Matrix A Guide to Delivering Evidence-Based Psychological Therapies in Scotland</a>, NHS Education for Scotland, 2014)</li></ul>	<ul style="list-style-type: none"><li>• Staff supervising psychological therapies have an appropriate qualification and substantial experience in the intervention being supervised and appropriate supervision training</li><li>• Capacity to provide an appropriate level of individual and/or group supervision</li><li>• Ability to demonstrate good supervision skills in training and developing skills around: understanding behaviour; work relationship dynamics; maintaining personal boundaries; work-life balance</li></ul>

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities have support from staff who can provide clinical supervision to others (continued)</b>	<ul style="list-style-type: none"><li>• Knowledge of how to provide regular and frequent individual supervision for all staff</li><li>• Knowledge of how to observe staff working practices and provide verbal and written feedback, and systematically check procedural fidelity in delivering agreed support plans</li><li>• Understanding of how the quality of treatment provided will be enhanced by psychological therapies supervision which will reduce potentially harmful variations in practice and ensure delivery of therapy in line with best practice and the evidence base</li></ul>	

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities have support from staff who can provide clinical supervision to others (continued)</b>	<ul style="list-style-type: none"><li>• Knowledge of the role of supervision in terms of supporting the skills, training and personal wellbeing needs of others within the team such that they can fulfil their roles adequately</li><li>• Understanding of the importance of practice leadership</li><li>• Understanding of options for formal training at various levels including the additional requirements to practise as a supervisor and a trainer for specific therapeutic approaches</li></ul>	

The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities have support from staff who can provide clinical supervision to others (continued)</b>	<ul style="list-style-type: none"><li>• Understanding of the role of supervision in terms of supporting the skills, training and personal wellbeing needs of others within the team such that they can fulfil their roles adequately</li></ul>	

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities receive support from staff who benefit from specialist supervision</b>	<ul style="list-style-type: none"><li>• Understanding of the importance of participation in regular supervision of casework and wider systemic issues, including difficult situations and risk.</li><li>• Understanding of the importance of supervisors having the opportunity to develop or refresh their supervision skills through CPD</li><li>• Understanding that anyone delivering psychological therapies should be appropriately trained and supervised</li></ul>	<ul style="list-style-type: none"><li>• Participates in regular clinical supervision by experienced peers</li><li>• Uses supervision as a key component of clinical governance</li><li>• Uses supervision to develop clinical skills and identify needs in relation to continuing professional development</li><li>• Uses supervision to enhance performance in relation to work with individuals</li></ul>

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities receive support from staff who benefit from specialist supervision (continued)</b>	<ul style="list-style-type: none"><li>• Understanding of the importance of regular supervision being in line with existing guidelines for the particular therapeutic modality. This supervision should address all ongoing clinical cases, and be informed by routine individual outcome measures.</li><li>• Knowledge of the training and experience required to practise as a supervisor and a trainer within each modality</li></ul>	

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities have support from staff who can identify and support the training needs of other staff</b>	<ul style="list-style-type: none"><li>• Knowledge of factors which need to be considered in the planning of training including:<ul style="list-style-type: none"><li>• The baseline knowledge and skills of the group targeted for training</li><li>• A curriculum designed and evaluated on sound educational principles</li><li>• The opportunity, as an integral part of the training, for skills development over time through supervised clinical practice or coaching</li></ul></li></ul>	<ul style="list-style-type: none"><li>• Assess the resources at macro organisational level</li><li>• Develop strategic plan for whole team training and continued professional development</li><li>• Capacity to reflect on training and support needs of other members of staff</li><li>• Conduct training audits, identify gaps in staff knowledge and deliver training support as required</li><li>• Ensure staff are trained in or have access to, specialist behavioural skills, in order to write high quality plans based on accurate assessment data</li></ul>

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities have support from staff who can identify and support the training needs of other staff (continued)</b></p>	<ul style="list-style-type: none"> <li>• The knowledge, skills and experience of the trainers and supervisors, in the particular psychological intervention</li> <li>• The competence of the trainers to deliver training effectively</li> <li>• Systematic assessment of knowledge and skills acquired during training</li> </ul>	<ul style="list-style-type: none"> <li>• Ensure that all members of the support team understand and are able to accurately implement each Behaviour Support Plan, for every person being supported</li> <li>• Demonstrate to members of the team the strategies described within the Behaviour Support Plan</li> <li>• Maintain quality by offering direct coaching to others in implementation of strategies and provide regular performance feedback</li> <li>• Train direct carers in the use of the data gathering methods</li> </ul>

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities have support from staff who can identify and support the training needs of other staff (continued)</b>		<ul style="list-style-type: none"><li>• Support other staff to describe and deliver the values and core aims of the organisation, orally, in writing and in actions.</li><li>• Teach direct carers why adhering to the Behaviour Support Plan is important.</li><li>• Explain possible long-term implications, such as how failing to ensure high levels of procedural integrity can result in challenging behaviour, poor quality of life and repeated, unnecessary revisions to the Behaviour Support Plan (i.e. people mistakenly think the Behaviour Support Plan is the problem)</li></ul>

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities have support from staff who can identify and support the training needs of other staff (continued)</b>		<ul style="list-style-type: none"><li>• Provide feedback to supervisees and stakeholders on what worked well and what could have worked better</li><li>• To reflect on current in-service training needs in line with service development</li><li>• Training should cover the identification and assessment of possible differential diagnoses as well as co-occurring conditions and how to be aware of the individual profile of those attending for diagnostic assessments so as to facilitate smooth transition to appropriate services.</li></ul>

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities have support from staff who can identify and support the training needs of other staff (continued)</b>		<ul style="list-style-type: none"><li>• Training should cover the neurodevelopmental and genetic bases of the disorder and the likely presentation at various points across the lifespan</li><li>• Training should enable staff to establish the specific needs of individuals presenting to the service, how to plan and adjust any intervention offered consistent with national guidelines and the need to collaborate with other agencies to ensure various needs are met. Training should enable staff to plan risk assessments which may need to be adapted to the social and communication needs of the individual</li></ul>

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities are supported by staff who know when and where to refer for specialist advice</b></p>	<ul style="list-style-type: none"> <li>• <i>Detailed knowledge of local services and specialists, their roles and functions</i></li> <li>• Knowledge of levels of risk and complexity in individual behaviours and presentations which may alert staff to consider referral for highly specialist advice</li> </ul>	<ul style="list-style-type: none"> <li>• <i>Refer to services and specialists as required</i></li> <li>• Ability to recognise when highly specialist supervision or support is required to support an intervention</li> <li>• Ability to recognise when the complexity of presentation, or level of risk, is such that referral to highly specialist professionals is appropriate</li> </ul>

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities who display challenging behaviour are supported by staff who meet the “Higher Level Behaviour Specialist/Organisational/Consultant” competencies highlighted in the PBS Competence Framework</b>	<ul style="list-style-type: none"><li>A very detailed set of competencies in Positive Behavioural Support for Higher Level Behaviour Specialist/Organisational/Consultant staff is detailed in the PBS Coalition document “Positive Behavioural Support (PBS): A Competence Framework” which is available at <a href="http://pbsacademy.org.uk/pbs-competence-framework/">http://pbsacademy.org.uk/pbs-competence-framework/</a>.</li></ul>	

**The Specialist Practice Level on psychological interventions for practitioners working with adults with learning disabilities outlines the knowledge and skills required by practitioners who, by virtue of their role and practice setting, play a specialist role in the provision of psychological interventions for adults with learning disabilities and their families and carers.**

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities receive psychological interventions from therapists who meet the requirements of relevant competence Frameworks for specific therapeutic approaches.</b></p>	<ul style="list-style-type: none"> <li>• Clear understanding of required competencies to apply different modalities of psychological therapy or intervention – this may include specific professional qualifications, other specific qualifications or supervised practice</li> <li>• Understand the importance of competence being established by direct observation of practice (whether in-vivo, or by recorded practice samples)</li> <li>• Achieves relevant qualification to demonstrate high level of knowledge</li> <li>• Participates in regular clinical supervision by experienced peers</li> <li>• Meets relevant competence level required for specific therapeutic approach (for example as shown at <a href="http://www.ucl.ac.uk/pals/research/cehp/research-groups/core/competence-Frameworks">http://www.ucl.ac.uk/pals/research/cehp/research-groups/core/competence-Frameworks</a>)</li> <li>• Ability to appropriately adapt therapeutic approach where appropriate to meet the needs of people with learning disabilities on an individual basis</li> </ul>	

## When working at a highly specialist level

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p>Adults with learning disabilities receive formulations drawn from a range of psychological models</p>	<ul style="list-style-type: none"><li>• <i>Expert knowledge and skill to individually tailor evidence-based psychological interventions relevant to people with learning disabilities</i></li><li>• <i>Expert knowledge of the range of options and interventions that support people with learning disabilities who are experiencing mental health problems</i></li><li>• <i>Thorough understanding of evidence-based approaches that can enhance psychological, social and physical wellbeing</i></li></ul>	<ul style="list-style-type: none"><li>• <i>When appropriate to role, individually tailor evidence-based psychological interventions relevant to people with learning disabilities</i></li><li>• <i>When appropriate to role, modify and adapt social, psychological and psycho-social interventions and evaluate effectiveness for people with learning disabilities</i></li></ul>

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities receive formulations drawn from a range of psychological models (continued)</b>	<ul style="list-style-type: none"><li>• Expert knowledge of a range of psychological therapies</li><li>• Expert knowledge of psychological formulation from a range of models, and of how formulation can integrate these models</li></ul>	<ul style="list-style-type: none"><li>• Ability to construct a clear formulation in complex cases</li><li>• Ability to integrate formulation from a range of psychological models</li><li>• Ability to lead multi-professional formulation</li></ul>

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities with the greatest complexity and/or risk (including those where is linked with complex mental health issues) have access to highly specialist psychological interventions</b>	<ul style="list-style-type: none"><li>• <i>Expert knowledge and skill to individually tailor evidence-based psychological interventions relevant to people with learning disabilities</i></li><li>• <i>Expert knowledge of the range of options and interventions that support people with learning disabilities who are experiencing mental health problems</i></li><li>• <i>Expert knowledge of different perceptions of risk and the range of approaches to the management of risk</i></li></ul>	<ul style="list-style-type: none"><li>• Act as a source of expert advice on the benefits of risk enablement in supporting adults with learning disabilities to have choice and control</li><li>• Design interventions that carefully balance the wishes of the individual and associated risks</li><li>• Complete comprehensive assessments where there are a wide range of complexities to be taken into account</li><li>• Design PBS plans that are achievable in the context of complex personal and situational factors</li></ul>

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities with the greatest complexity and/or risk (including those where is linked with complex mental health issues) have access to highly specialist psychological interventions (continued)</b></p>	<ul style="list-style-type: none"> <li>• Expert knowledge of the assessment and treatment of complex and high-risk challenging behaviour or mental health issues</li> </ul>	<ul style="list-style-type: none"> <li>• Integrate psychological therapy into PBS plans</li> <li>• Effect organisational change to meet needs of individuals</li> <li>• Ability to apply extensive theoretical knowledge to complex individual presentations</li> <li>• Capacity to manage and plan for endings in therapeutic contact with individuals, families and carers</li> </ul>

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities who have severe and enduring or very complex needs are provided with highly specialist psychological therapy</b>	<ul style="list-style-type: none"><li>• <i>Expert knowledge and skill to individually tailor evidence-based psychological interventions relevant to people with learning disabilities</i></li><li>• <i>Expert knowledge of the range of options and interventions that support people with learning disabilities who are experiencing mental health problems</i></li><li>• <i>Thorough understanding of evidence-based approaches that can enhance psychological, social and physical wellbeing</i></li></ul>	<ul style="list-style-type: none"><li>• <i>When appropriate to role, individually tailor evidence-based psychological interventions relevant to people with learning disabilities</i></li><li>• <i>When appropriate to role, modify and adapt social, psychological and psycho-social interventions and evaluate effectiveness for people with learning disabilities</i></li><li>• Ability to use a range of psychological therapies</li><li>• Ability to adapt these to meet individual service user needs</li></ul>

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<b>Adults with learning disabilities who have severe and enduring or very complex needs are provided with highly specialist psychological therapy (continued)</b>	<ul style="list-style-type: none"><li>• Expert knowledge of a range of psychological therapies</li><li>• Expert knowledge of how to adapt these for adults with learning disabilities and how this relates to the evidence base</li></ul>	<ul style="list-style-type: none"><li>• Ability to apply extensive theoretical knowledge to complex individual presentations</li><li>• Ability to integrate therapeutic approaches with the wider service context</li></ul>

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities have access to integrated therapeutic approaches where this meets their individual need</b></p>	<ul style="list-style-type: none"> <li>• <i>Expert knowledge and skill to individually tailor evidence-based psychological interventions relevant to people with learning disabilities</i></li> <li>• <i>Expert knowledge of the range of options and interventions that support people with learning disabilities who are experiencing mental health problems</i></li> <li>• <i>Thorough understanding of evidence-based approaches that can enhance psychological, social and physical wellbeing</i></li> </ul>	<ul style="list-style-type: none"> <li>• When appropriate to role, individually tailor evidence-based psychological interventions relevant to people with learning disabilities</li> <li>• When appropriate to role, modify and adapt social, psychological and psycho-social interventions and evaluate effectiveness for people with learning disabilities</li> <li>• Capacity to reflect on current practice and to adapt it to meet the requirements of the service users or change in referral patterns</li> </ul>

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities have access to integrated therapeutic approaches where this meets their individual need (continued)</b></p>	<ul style="list-style-type: none"> <li>Expert knowledge of how psychological therapeutic approaches can be integrated on the basis of individual need</li> </ul>	<ul style="list-style-type: none"> <li>Capacity to reflect on the nature of the service being offered and possible changes in practice to accommodate individuals and their families</li> <li>Ability to match the level of intervention as far as possible to the level of service user need, taking into account such factors as risk, problem severity, chronicity, co-morbidity, social complexity, history of previous treatments and service user's preference</li> <li>Ability to integrate different therapeutic approaches on the basis of individual need</li> </ul>

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities have access to creative formulation-based psychological therapy where the evidence base to meet their needs is currently limited. This includes careful monitoring and evaluation of the approach on an individual basis</b></p>	<ul style="list-style-type: none"> <li>• Expert knowledge and skill to individually tailor evidence-based psychological interventions relevant to people with learning disabilities</li> <li>• Expert knowledge of the range of options and interventions that support people with learning disabilities who are experiencing mental health problems</li> <li>• Thorough understanding of evidence-based approaches that can enhance psychological, social and physical wellbeing</li> <li>• Knowledge of how to introduce, monitor and evaluate new therapeutic approaches with integrity</li> </ul>	<ul style="list-style-type: none"> <li>• <i>When appropriate to role, individually tailor evidence-based psychological interventions relevant to people with learning disabilities</i></li> <li>• <i>When appropriate to role, modify and adapt social, psychological and psycho-social interventions and evaluate effectiveness for people with learning disabilities</i></li> <li>• Ability to be creative in finding potential formulation-based approaches where standard approaches are not appropriate</li> </ul>

Outcome	What practitioners know (knowledge)	What practitioners are able to do (capability/skill/ability)
<p><b>Adults with learning disabilities have access to creative formulation-based psychological therapy where the evidence base to meet their needs is currently limited. This includes careful monitoring and evaluation of the approach on an individual basis (continued)</b></p>	<ul style="list-style-type: none"> <li>• Knowledge of how to introduce, monitor and evaluate innovative adaptations to standard treatment approaches with integrity</li> <li>• Expert understanding of single-case design interventions</li> </ul>	<ul style="list-style-type: none"> <li>• Ability to work collaboratively with adults with learning disabilities when such a creative/innovate approach is indicated</li> <li>• Ability to carefully monitor, evaluate and adjust therapeutic interventions on an individual basis</li> </ul>

## Appendix 2. Structure of PBS Coalition PBS Competencies Framework Headings

### **Competence Area 1:** Creating high quality care and support environments

- 1.1 Ensuring that services are values led
- 1.2 Knowing the person
- 1.3 Matching support with each person's capabilities and with goals and outcomes that are personally important to them
- 1.4 Establishing clear roles and effective team work
- 1.5 Supporting communication
- 1.6 Supporting Choice
- 1.7 Supporting physical and mental health
- 1.8 Supporting relationships with family, friends and wider community
- 1.9 Supporting safe, consistent and predictable environments
- 1.10 Supporting appropriate levels of participation in meaningful activity
- 1.11 Knowing and understanding relevant legislation
- 1.12 A commitment to Behaviour Skills Training

### **Competence Area 2:** Functional, contextual and skills-based assessment

- 2.1 Working in partnership with stakeholders
- 2.2 Assessing match between the person and their environment and mediator analysis
- 2.3 Knowing the health of the person
- 2.4 Understanding the principles of behaviour (4 term contingency), how behaviour is learned and understanding the function of behaviour
- 2.5 Supporting data driven decision making
- 2.6 Assessing the function of a person's behaviour
- 2.7 Assessing a person's skills and understanding their abilities
- 2.8 Assessing a person's preferences and understanding what motivates them

## Appendix 2. Structure of PBS Coalition PBS Competencies Framework Headings

**Competence Area 3:** Developing and implementing a Behaviour Support Plan; Evaluating intervention effects and on-going monitoring

- |            |   |            |  |
|------------|---|------------|--|
| <b>3.1</b> | Understanding the rationale of a BSP and its uses   | <b>3.6</b> | Developing the plan; outlining responsibilities and timeframes               |
| <b>3.2</b> | Synthesizing data to create an overview of a person's skills and needs  | <b>3.7</b> | Monitoring the delivery of the BSP (procedural/treatment fidelity/integrity) |
| <b>3.3</b> | Constructing a model that explains the functions of a person's challenging behaviour and how those are maintained | <b>3.8</b> | Evaluating the effectiveness of the BSP                                      |
| <b>3.4</b> | Devising and implementing multi-element evidence-based support strategies based on the overview and model         | <b>3.9</b> | The BSP as a live document   |
| <b>3.5</b> | Devising and implementing a least restrictive crisis management strategy  |            |  |

## Appendix 3.

Psychological interventions and therapies with a strong evidence-base for adults with learning disabilities, as detailed in the “People with Learning Disabilities” evidence table in [The Matrix](#) (2014) “A Guide to Delivering Evidence-Based Psychological Therapies in Scotland”:

### Anger

- Group anger management - cognitive and behavioural
- Individual cognitive behavioural therapy for anger

### Anxiety

- Behavioural relaxation training

### Challenging Behaviour

- Functional analysis and behavioural interventions; use of functional analysis to determine antecedent management, including stimulus control, setting events, establishing operations, differential reinforcement,

adjustment of environmental variables and those internal to the person

- Positive behavioural support; Values-based activity and support planning with effective assistance to involve the person in meaningful activity; environmental redesign; Incorporates proactive strategies for reducing the likelihood of the occurrence of the behaviour, and reactive plans for managing the behaviour when it occurs; Incorporates individual and carer/systems change approaches
- Active support; Patient-focused interactive training and coaching for carers in active support for meaningful engagement in activities

## Appendix 3.

Psychological interventions and therapies with a strong evidence-base for adults with learning disabilities, as detailed in the “People with Learning Disabilities” evidence table in [The Matrix](#) (2014) “A Guide to Delivering Evidence-Based Psychological Therapies in Scotland”:

### Challenging Behaviour (continued)

- Functional equivalence/Functional communication training; Teaching alternative adaptive responses, new skills or ways of communicating to gain the same outcome, without using challenging behaviours
- Extinction; Extinction should only be considered for nondangerous behaviours, i.e. not aggressive, destructive or self-injurious behaviour
- Specialist Teams; Use of a specialist behaviour therapy team in addition to standard treatments is both more effective and more efficient in reducing challenging behaviours and may have financial advantages over standard treatment

- Social problem solving; Teaching skills to devise an effective strategy in a given situation where challenging behaviour may occur. Taught in addition to specific skills to cope in these situations

### Depression

- Group CBT with an additional component concerning social support

### Psychosis

- Individual CBT

## Appendix 4.

Examples of adaptations that can be made to make psychological therapy more accessible to people with learning disabilities

**Examples of adaptations that can be made to make psychological therapy more accessible to people with learning disabilities**

**IAPT ‘Learning Disabilities Positive Practice Guide’**

- The core recommended adaptations for interventions are:

- a.** Use accessible communications, easy read medication and self-help guides.
- b.** Emphasise less cognitive elements and more behavioural elements within the intervention structure.
- c.** Focus on delivering a small set of interventions well rather than trying to cover too many.
- d.** Expect a significant need for repetition and, particularly when there is more than a week between sessions, the need to completely recap skills on a continuous basis.
- e.** Consider inviting supporters into therapy for some or all of the sessions. Ensure that the supporters are properly briefed with respect to what is expected of them in the session.
- f.** Allow extra time to involve the supporter/carer/family so that they can facilitate with homework, repetition and interpretation. The client could make an audio recording of the session, the things to practise, or a reminder of their thoughts or emotions.

- g.** Adjust the length of sessions if necessary (they may need to be shorter if concentration is a problem, or longer to cover the outcome measures and minimum data set – this is offered as a reasonable adjustment to other protected groups in IAPT services).
- h.** Negotiate access to specialist clinical supervision for practitioners.
- i.** Send reminders of session times, by text or telephone call, to the client, and to the supporter, so that they can plan what is needed to get the person into the therapy room.

# Appendices

## Appendix 4.

Examples of adaptations that can be made to make psychological therapy more accessible to people with learning disabilities

### Thinking About Me

#### Recommended adaptations include:

- simplification: using more straightforward techniques, explaining the process more, reducing the length of sessions
- language: simplifying speech, using shorter sentences and more easily understood words
- activities: using drawings and homework assignments to help the client understand and remember the work from sessions
- developmental level: considering the person's developmental level and using appropriate games, discussion of current news stories or television programmes to support therapeutic techniques
- directive methods: being more directive (depending on the person's ability level), perhaps defining treatment goals and using visual materials to highlight progress
- flexible methods: adjusting techniques to suit the client's ability level
- caregiver involvement: involving family or support staff is more common with clients with learning disabilities, with consideration being given to confidentiality issues, blurring of roles for support staff and the risk that the client will not feel in control of his or her own treatment

- transference: recognizing that the client may (unconsciously) transfer some of his or her feelings about relationships with a parent onto the therapist by, for instance, being “childish” or angered if asked to undertake a task between sessions
- disability/rehabilitation approaches: addressing the issue of disability within the treatment, with the therapist supporting the client to develop a positive view of him or herself.
