8.	Description of the training post	This 12month post is designed to provide broad experience in Special Care Dentistry and will involve duties in Ninewells hospital or other clinical settings from time to time. The trainee may gain experience in treatment planning complex patients, intravenous and inhalation sedation, exodontia and managing dental anxiety alongside a clinical psychologist. In this post you will also provide a wide range of outpatient restorative care.
9.	Primary Care training element	N/A
10.	Educational programme summary and library facilities	<p>There is a Scotland-wide education programme for Dental Core Trainees which is designed to match the DCT curriculum. The programme has four themes running through each year of Dental Core Training. These are: Clinical, Communication, Career Development Skills and Quality Improvement & Patient Safety. Posts begin with a local health board and NES induction, followed by a number of face-to-face study events throughout the year, supported by Turas Learn. These events include all Dental Core Trainees in Scotland, as does the annual trainee conference. All trainees have access to study leave time (in line with terms and conditions of service) and budget. This may be used to access MFDS/MFD/MJDF courses and other courses linked to an agreed PDP. DCT posts include time for self-directed learning and trainees are encouraged to use this time for personal study and to complete quality improvement projects.</p> <p>All DCTs, who have not worked in an Oral and Maxillofacial Surgery (OMFS) unit in Scotland previously, attend an additional two-day induction course: Maxfacts. This course is designed to cover the essential skills for an OMFS DCT post and is delivered by OMFS consultants and senior trainees. The teaching is backed up by on-line resources which will be made available to DCTs prior to the Maxfacts course.</p>
11.	Employment information	

12.	Employer	NHS Education for Scotland (NES)
13.	Placement Board	NHS Tayside
